Professional Summary

I am a highly skilled and results-driven Front-end developer with over three years of experience in software development. My expertise lies in HTML5, CSS, CSS3, JavaScript, Bootstrap, Tailwind, React and Python(in progress).

I have a successful track record in developing RESTful Apis. My strong understanding of domain-driven design (DDD) allows me to create efficient and scalable solutions.

My ability to thrive in agile development environments enables me to adapt quickly to changing requirements and work collaboratively with cross-functional teams likewise remotely. I am committed to providing reliable support and prompt issue resolution to ensure the smooth functioning of applications.

Overall, I am passionate about delivering high-quality software solutions and continuously learning and improving my skills in order to stay up to date with the latest industry trends.

Employment History

Front-end development(remotely)

2020-2021

- Built a food website.
